

TURFGRASS VARIETIES

ENVIRONMENTAL TURF

SeaDwarf seashore paspalum is a true dwarf paspalum, which means it delivers fast green speeds and high-quality greens. SeaDwarf may be used for high-quality, tee-to-green golf courses, offering superintendents just one grass to manage. SeaDwarf is drought tolerant, requires up to half the water for irrigation needed by Bermudagrass, and may be irrigated with a wide range in water quality - from potable water to brackish, effluent, even seawater with proper maintenance. The way it grows enables it to heal twice as fast as Bermudagrass from divots and sports-related damage. SeaDwarf is environmentally friendly and is highly salt-tolerant. It requires as much as 75 percent less nitrogen for fertilization than Bermudagrass. Additionally, salt can be used as an herbicide.

Aloha seashore paspalum was developed by the University of Florida. Fine-textured with a deep green color, Aloha requires as much as 75 percent less nitrogen for fertilization than Bermudagrass, as much as 50 percent less water for irrigation, and can be irrigated with a range of water sources - from potable water to brackish, effluent, even seawater with proper maintenance. Salt can be used as an herbicide. The cultivar tolerates salt spray and salt water inundation. Aloha can be used in combination with SeaDwarf for longer roughs and color contrast.

PristineFlora zoysiagrass also was developed by the University of Florida. PristineFlora zoysia is a highly shade-tolerant grass with a fine texture and rich green color. It can be used for golf and ornamental use. It works well on golf course tees and fairways. It's faster growing than many other common zoysiagrasses, allowing it to heal from wear. It also tolerates most herbicides.

LESCO

Noble Eagle perennial ryegrass blend contains three advanced-generation cultivars of turf-type perennial ryegrass derived from three unique genetic backgrounds. All three varieties - Notable (Exp AF), Prototype (exp DCM) and Attribute (exp CIS PR270) - have demonstrated ideal turf performance at varied mowing heights and maintenance levels in the current NTEP trial. The varieties have good turf density ratings and have shown resistance to gray leaf spot. Noble Eagle is a premium ryegrass blend and is blue-tag certified. It works well in high-traffic areas such as golf course tees and fairways.

JACKLIN SEED BY SIMPLOT

4-Season Kentucky bluegrass is an elite variety with remarkable spring green-up. Its year-round performance earns the "four-season" designation. It features a darker green color, improved disease resistances and heat/drought tolerance.

SCOTTS TURF-SEED

Developed by Pure Seed Testing in cooperation with the University of Georgia, **Sea Spray paspalum** is the first release of an improved, seeded seashore paspalum. Ideal for temperate to hot, humid coastal climates, it's extremely salt tolerant and is drought and shade tolerant. Bright, blue-green in color, it's ideal for use on turfgrass areas irrigated with effluent water or subject to naturally high saline conditions.
